Practice Assignment: Upload a file	76.92 %	77.00	0-100	77.00 %	Great work on this assignment - here are my comments about your paper. First, I think you are really on to something with your analysis. Your thoughtful insights regarding the author's dilemma dig into some of the deeper issues related to leadership and ethical decision making. Incorporating your personal experiences in a similar situation demonstrates that you truly grasp the information and have made some critical connections between the "theory" and the application. Moving forward - what might you do in your leadership role to challenge this theory? What other research/authors have you uncovered that support (or challenge) what it truly means to lead in an ever-changing climate? Consider your role as a mentor - and the impact you have not only on your organization - but on the many interactions your group has with partners, constituents, and volunteers. What a great opportunity to help change move forward!
